First we suggest families check eligibility requirements for the appropriate government programs. Second, use the private programs for issues that are not covered by a program. We encourage families to create a “matching program” to incentivize these private programs to assist with smaller amounts that can add up to/chip away at balances. Start match with personal amount from applicant. Keep organized records and write down any pledges you get and contact information of organization and person who notified you. Finally remember all of these programs require documentation so the more prepared and organized you are, the better your outcome.

Contact NJ Board of Public Utilities at 800-624-0241 between 9am to 4pm.
